

ALEXANDER WOLF & COMPANY, INC.

CLOTHES WASHING

RECOMMENDED PROCEDURE

CORONAVIRUS (COVID-19)

- Laundering of linens and clothing helps prevent the spread of Coronavirus.
- Please do not shake dry laundry to help minimize the possibility of dispersing the virus in the air.
- Please take safety precautions and wear disposable gloves when handling laundry that could potentially be infected.
- Keep soiled linens away from your body while loading them into the washer.
- The hotter water the better. Viruses hate heat! CDC guidelines recommend the following to further disinfect fabrics:
 - Use the warmest water that the fabric will tolerate
 - When drying, use the highest heat setting applicable for the fabric
- Use the right amount of soap. Too much soap creates excess suds that enable dirt and grime to remain inside the fabric. The right amount of soap will properly clean and will then be completely rinsed from your items. If the fabric allows, use bleach to kill germs.
- Clean and Disinfect. Take these extra steps:
 - Clean laundry baskets, carts, and hampers as often as possible
 - Prior to and after loading the washer or dryer, wipe down any knobs, controls, handles, or other components or touched surfaces — don't forget the folding table!
 - Sanitize your hands using soap and warm water.
 - Place clean laundry in a clean basket or laundry bag
